## SUBJECT : Growth at M2S

---

Québec, November 18, 2009

M2S has materialized an important agreement with a new partner in the Transportation market segment.

In fact, M2S will supply from its local plant, complex printed circuit board assembly and R&D services. M2S has received a new firm order and forecasts totalizing global annual sales of approximately \$1.8M for 2010-2011. Some shipments have already started on service parts while new parts will start shipping in April of 2010 for a period of 24 months.

This agreement is the beginning of a new partnership between the 2 companies for many years to come. M2S Management wishes to thank all its employees for their implications and the quality of services supplied. These elements, as well as the multi-faculty services offered by M2S were important in the partner's decision.

Soon, M2S will announce other important and strategic news about the improvement of services for respected clients and partners.

**About M2S :** M2S Electronics works in partnership with manufacturers in North America, offering contract manufacturing value-added services in electronics, that meets the client's expectations. In conformity with our values of Progress, Control and Harmony.
