

**BULLETIN****SUBJECT : M2S solidifies its Asian partnership****M2S Electronic in Asia**

Québec City, November 22<sup>nd</sup> 2006.

M2S Electronics, sub-contractor in electronic circuit development and assembly for a large market segment, solidifies its partnership with many companies in Asia.

M2S Electronic President General Director and Procurement Director just came back from visiting partners in Asia. Conforming actual orders and issuing new ones for more than \$1M with the partners was the first objective for this trip. We also qualified new suppliers to continue our business development and increase the supply chain possibilities to offer our clients more turnkey electronic products at an optimal price.

M2S has twenty electronic finish products assembled in Asia now and distributed from its local head office in Quebec City. Those products represent about 200,000 units annually and are totally managed by M2S for its client total satisfaction.

M2S Electronics celebrates its 25<sup>th</sup> anniversary with all its employees and business partners. M2S Electronics had 120% growth of its business in the last 6 years and forecast to continue this growth with major investments into its infrastructure, equipment and management tools.
